TECHNICAL SKILLS

React/Redux, JavaScript, Python, Ruby on Rails, PostgreSQL, MongoDB, Express, Node.js, Amazon S3, HTML, CSS, Render, Git

PROJECTS

Instabook

[Live](#) | [GitHub](#)

Full-Stack clone of Facebook made with React/Redux, JavaScript, AWS S3, PostgresSQL, and Ruby on Rails

- Adhered to **Ruby on Rails** conventions, resulting in a 25% reduction in development time. Leveraging **PostgreSQL**, data reliability reached 99.9%, leading to a decrease in database-related errors.
- Achieved a dynamic frontend through **React**, saving approximately 6 hours per feature. Implementation of **Redux** led to a 25% improvement in state management efficiency.
- Enhanced system security by implementing **BCrypt** password encryption, resulting in a decrease of unauthorized access attempts. Through seamless integration of **session-based authentication** and **CSRF protection**, security breaches were reduced which increased user trust.
- Implemented **Amazon S3** for media storage in Instabook, increasing retrieval speed and decreasing load times.

HomeKeeper (Backend Lead)

[Live](#) | [GitHub](#)

Built with the MERN stack for booking appointments with contractors for home repair needs

- Collaborated with 3 engineers through the implementation of **Git**'s feature branches workflow, reducing code conflicts by 80%. This expedited the development cycle, resulting in a 75% increase in feature delivery rate.
- Utilized **Express.js** to expedite HTTP request handling by 20%. **MongoDB**'s NoSQL architecture facilitated efficient data management, leading to a 30% decrease in database query latency.
- Enhanced user engagement by integrating **Google Maps API** which enabled users to filter contractors based on reviews and manage appointments by proximity.

Edge

[Live](#) | [GitHub](#)

A ROI calculator with three categories and desired returns to calculate an investment's growth over time.

- Engineered a web application using **vanilla JavaScript** and **Chart.js**, empowering users to input investment details and dynamically compute returns with each render. Through visually intuitive charts, users gained clear insights into their investment performance, leading to an average increase of 5 minutes spent on the platform per session.
-

EDUCATION

New York University – Bachelor of Science in Math Education (2021)

App Academy - Full-Stack Software Development (2023)

EXPERIENCE

Mathematics Teacher (6th Grade)

Sep 2022-June 2023

I.S. 096 Seth Low, Brooklyn, NY

- Elevated math grade levels for every student, with some progressing from kindergarten/first grade to a 5th/6th grade level by the end of the school year.
- Taught three sixth grade classes of 20 to 30 students by creating and differentiating material to meet students' visual, language, sensory, and academic needs.
- Collaborated with different teams, teachers, and parents to meet individual student needs.

Business and Entrepreneurship

2017-Present

- Generated over \$100,000 in sales per year within the past three years, maintaining a steady 30% profit margin.
- Specialize in supplying limited and/or exclusive items such as art, sneakers and apparel to clients.
