

SPENCER HEYWOOD

FULL STACK WEB DEVELOPER - REACT SPECIALIST

[971-777-1485](tel:971-777-1485) | Contact@SpencerHeywood.com | Jersey City, NJ | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Accomplished Software Engineer with 4+ years of experience in web development, specializing in JavaScript and React. Adept at designing, developing, and troubleshooting software solutions with a focus on front-end technologies and agile methodologies. Eager to apply my technical skills and collaborative approach to drive innovation in the Corporate & Investment Bank team at JPMorgan Chase.

TECHNICAL SKILLS

Technologies: React, JavaScript, Redux, Webpack, PostgreSQL, Ruby, Git, SQL, CSS, HTML, Rails, Nginx

Key Skills: RESTful Routes, Object-Oriented Programming (OOP), Test-Driven Development (TDD)

SELF-HOSTED WEB APPLICATIONS

DASHDOOR (Full-Stack)

[Live](#) | [GitHub Repo](#)

Mobile Optimized DoorDash Clone

- Hand tailored over 20 RESTful API endpoints to optimize data transfer for the HTTP request/response cycle.
- Transformed application-wide data management through integration with Redux and Thunk middleware, achieving a centralized and highly accessible state management system.
- Elevated performance of a PostgreSQL database by using Rails' Active Record to eliminate redundant queries, and streamline backend processing through indexed lookups.

HOME KEEPER (Full-Stack)

[Live](#) | [GitHub Repo](#)

Home Service Provider Directory with Appointments

- Devised several custom Google Maps elements for user-friendly, interactive data visualization, ensuring team-wide secure API key storage to establish high standards of data security.
- Demonstrated a wide breadth of modern CSS techniques to provide a clean interface to a robust pool of data.
- Architected a Raspberry Pi-based home server with secure Nginx and DNS configurations, boasting a 1.2s site speed index and acting as a cost-effective AWS S3 alternative.

NUGGET RUSH (Client-side)

[Live](#) | [GitHub Repo](#)

Single-Page, Interactive Canvas Clicker

- Carefully adhered to an Object-Oriented Programming (OOP) methodology by building custom classes and inheritance chains in Vanilla JavaScript to enhance code organization and modularity.
 - Crafted a mini-framework featuring a custom flag system, significantly boosting scalability and performance.
-

EDUCATION

Full-Stack Software Engineer Certificate

App Academy, NY – 2023

Coursework in Management Information Systems

Utah State University – 2019

RELEVANT EXPERIENCE

TECHNICAL PRODUCT MANAGER

November 2021 - March 2023

SERVO, St George UT

- Led the integration of multiple interdependent Shopify apps, significantly improving the functionality of a prototype platform by establishing sophisticated quoting, scheduling, and payment processes.
- Orchestrated strategic and technical initiatives for a diverse team of over 10 third-party engineers and designers, successfully guiding efforts that were crucial in securing the company's initial 50 customers.

OPERATIONS & TECHNOLOGY MANAGER

April 2019 - November 2021

Ease Window Cleaning, Logan UT

- Developed an online quoting algorithm that closely matched the precision of in-person methods. This innovation automated over 90% of the quoting process, and more than tripled online lead generation.

SYSTEM ASSEMBLY & TECHNICAL SUPPORT

January 2019 - April 2019

RedRockI.T., Sandy UT

- Implemented efficient computer assembly protocols, achieving a 15% increase in production speed while maintaining zero compromise on system failure rates and strictly adhering to quality standards.
- Resolved a broad spectrum of hardware and software issues, restoring functionality or significantly boosting computer performance and system speed.
