

SPENCER HEYWOOD

FULL STACK WEB ENGINEER

[971-777-1485](tel:971-777-1485) | Contact@SpencerHeywood.com | New York City, NY | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Dynamic Software Engineer with over 4 years of experience in developing innovative software solutions. Proven track record in team collaboration, and full-stack development. Passionate about leveraging skills in JavaScript, Ruby, and React.js to drive business growth and efficiency.

TECHNICAL SKILLS

Technologies: JavaScript, Ruby, SQL, CSS3, HTML5, React, Redux, Ruby on Rails, PostgreSQL, Webpack, Nginx

Key Skills: RESTful Routes, Object-Oriented Programming (OOP), Test-Driven Development (TDD)

SELF-HOSTED WEB APPLICATIONS

DASHDOOR (Full-Stack)

[Live](#) | [GitHub Repo](#)

Mobile Optimized DoorDash Clone

- Tailored over 20 RESTful API endpoints to facilitate data transfer for the HTTP request/response cycle.
- Managed PostgreSQL database using Rails' Active Record in order to manipulate, format, and validate data.
- Implemented Redux state management paired with Thunk middleware for streamlined data accessibility.
- Built and maintained a Raspberry Pi-based home server with secure Nginx and DNS configurations, boasting a 1.4s site speed index and acting as a cost-effective AWS S3 alternative.

HOME KEEPER (Full-Stack)

[Live](#) | [GitHub Repo](#)

Home Service Provider Directory with Appointments

- Implemented several custom Google Maps elements for user-friendly, interactive data visualization, ensuring secure API key storage to maintain high standards of data security.
- Demonstrated a variety of modern CSS techniques to provide a clean interface to a robust pool of data

NUGGET RUSH (Client-side)

[Live](#) | [GitHub Repo](#)

Single-Page, Interactive Canvas Clicker

- Established a centralized JSON file with a custom flag system to define object position, size, and functionality.
 - Implemented an Object-Oriented Programming (OOP) methodology by building custom classes and inheritance chains in Vanilla JavaScript to enhance code organization and modularity.
-

RELEVANT EXPERIENCE

TECHNICAL PRODUCT MANAGER

November 2021 - March 2023

SERVO, St George UT

- Coordinated integration of several interdependent third-party shopify apps including quoting, scheduling, work order creation, and payment distribution for a highly functional prototype platform.
- Supported a team of over 10 engineers and designers contributing to overall strategy, hands-on technical

development, and aiding in securing the first 50 customers.

OPERATIONS & TECHNOLOGY MANAGER

February 2019 - November 2021

Ease Window Cleaning, Logan UT

- Wrote a quoting algorithm with accuracy within 5% of in-person quotes, resulting in more than an 80% increase in quoting efficiency and boosting online lead conversions by 25%.
-

EDUCATION

Full-Stack Software Engineer Certificate

App Academy, NY – 2023

Coursework in Management Information Systems

Utah State University – 2019
