WEB APPLICATIONS

BOOKSERVO.COM - Ruby on Rails - React

[Live](#) | [GitHub Repo](#)

Online Booking for Home Services

- Drove development of a custom checkout flow using Stripe API to granularize control over payment processes, ensuring strict PCI compliance through advanced card tokenization and domain verification.
- Engineered the platform's Google Calendar integration for real-time scheduling, enhancing user experience and resulting in a 70% adoption rate among service providers.

DASHDOOR - Ruby on Rails - React

[Live](#) | [GitHub Repo](#)

Mobile Optimized DoorDash Clone

- Centralized application-wide data management through integration with Redux and Thunk middleware, resulting in a standardized and highly accessible state management system.
 - Elevated performance of a PostgreSQL database by using Rails' Active Record to eliminate redundant queries, and streamline backend processing through indexed lookups.
-

EDUCATION

Full-Stack Software Engineer Certificate

App Academy, NY – 2023

- 5% Admittance Rate
- Scoring in the Top 15% of Graduating Cohort

Coursework in Management Information Systems

Utah State University – 2019

EXPERIENCE

TECHNICAL PRODUCT OWNER

November 2021 - Present

SERVO, St George UT

- Led the integration of multiple interdependent API integrations, driving the core functionality of a prototype platform by establishing sophisticated quoting, scheduling, and payment processes.
- Orchestrated strategic and technical initiatives for a team of 5 engineers, successfully guiding efforts that were crucial in securing the company's initial customers.
