Hiring Manager
ACSYES
Eatontown, NJ 07724

Dear Hiring Manager,

I am excited to apply for the User Interface (UI) Developer position at ACSYES. With a solid background in front-end development and a passion for creating intuitive user interfaces, I would love to apply my skills to your team.

In my role at Servo, I have developed and maintained user interfaces using Rails, AJAX, and JavaScript. I have experience in implementing real-time communication with WebSockets and working with Linux systems. These experiences have equipped me with a well-rounded skill set that I am eager to apply to new challenges.

Some highlights of my experience include:

- **UI Development:** Building user-friendly interfaces and improving existing features.
- **Real-Time Communication:** Utilizing WebSockets for real time updates and communication.
- **Linux Systems:** Working with Linux systems and shell scripting for automation.
- **Testing and Quality:** Conducting thorough testing and clear documentation.

I am particularly drawn to this role because of ACSYES's commitment to innovation in wireless networking. Wired networking has always been of interest to me, and wireless seems like a progressive next step in my career. I am confident that my technical skills, combined with my proactive approach to problem-solving and teamwork, make me a strong candidate for this position.

Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and enthusiasms align with the needs of your team.

Sincerely,

Spencer Heywood
