Clinton, New Jersey, 08809, United States

Software developer with a diverse skill set and a reputation for innovative, solution-oriented thinking. Skilled in defining, developing, and testing highly functional software solutions in collaborative environments.

Work Experience

Founder & Technical Product Owner (TPO)

Apr 2021 - Present

| *SERVO*

- Addressed fundamental business needs by facilitating the transition from Shopify to our own server infrastructure achieving a 90.7% reduction in Technical Cost per Session (TCPS) , lowering it from \$0.41 to \$0.038 within 8 months.
- Defined product roadmap with technical specifications and criteria for testing of applications, leading a team of 5 specialist developers to successfully implement over 50 new platform features.
- Provide constructive feedback, mentorship, and code reviews to team members on a wide array of technical subject matter.
- Collaborated as the dedicated project management point of contact for 15 partner companies to assess requirements, align on priorities, and communicate progress throughout the development life cycle.

Projects

DashDoor

Nov 2023 - Dec 2023

Developed and self-hosted a full-stack DoorDash clone, DashDoor, suited for production environments. Utilized React, Ruby on Rails, and AWS to create a seamless food delivery platform with user authentication, order management, and payment integration.

- Centralized application-wide data management through a seamless integration with Redux and Thunk middleware, resulting in a standardized and highly accessible state management system.
- Elevated performance of a PostgreSQL database by using Rails' Active Record to eliminate 100% of redundant queries, and streamline backend processing through indexed lookups.
- Hand tailored over 20 RESTful API endpoints to optimize data transfer for the HTTP request/response cycle.

Core Skills

React, JavaScript, Node.js, PostgreSQL, SQLite, Ruby, Rails, Git, Websockets, Nginx, SQL, Redux, Shell Scripting, CSS, HTML, RSpec, Jest, Integrations : AWS S3, AWS SES, Google OAuth 2.0, Google Maps, Google Calendar, Stripe, MongoDB, Shopify, Agile, REST, GraphQL, Object-Oriented Programming (OOP), Test-Driven Development (TDD), Collaborating, Attention To Detail, Adaptability, Data Analytics, Technical Innovation, ideation, Critical Thinking, Problem-Solving, Strategic Planning, Payment Processing, Payment Distribution, User Authentication, Improved Reliability, Programming Languages, Problem-Solving Skills, Programming Principles, Business Requirements, Code Review, Coding Standards, Product Management, Provide Technical Support, Quality Assurance, Technical Documentation, Technical Skills

Education

Utah State University

Coursework Management Information Systems

Languages

English *(fluent)*, Spanish *(fluent)*

Awards

Activate Founders Credit Recipient

Amazon Web Services

Feb 2024

Awarded \$1,000 AWS Founders Credit for outstanding project development. Recognized for innovative use of AWS services, including cloud architecture design, implementation of cost-saving measures, and the successful deployment of scalable web and mobile applications.

Certificates

Full Stack Software Engineering

App Academy
