Clinton, New Jersey, 08809, United States

Full Stack Software Developer with a diverse skill set, a reputation for innovative solutions, a commitment to ongoing learning, and a consistent eye for detail. Skilled in developing and testing advanced software solutions in collaborative environments using Agile development methodologies.

Work Experience

Lead Software Engineer

Apr 2021 - Present

| *SERVO, LLC*

- Led the successful transition of our software products to our own server infrastructure, achieving a 90.7% reduction in Technical Cost per Session, lowering it from \$0.41 to \$0.038 within 8 months.
- Hands-on development of over 50 new front end features spanning all aspects of the development lifecycle, following UX driven design patterns and principles.
- Implemented complex data queries and cache policies, following the MVC architecture to optimize and improve upon critical application functionality.
- Performed root cause analysis on urgent system failures to prevent future occurrences, enhancing overall product quality and reliability.
- Provide constructive feedback, mentorship, and code reviews to team members on a wide array of technical subject matter.
- Collaborated as the dedicated technical point of contact for 15 partner companies to assess requirements, align on priorities, and communicate progress throughout the development life cycle.

Projects

DashDoor

Nov 2023 - Dec 2023

Developed a full-stack food delivery web application (React, JavaScript, Ruby on Rails, SQL) using AWS, implementing pixel-perfect design, user authentication, and order management.

- Centralized application-wide data management through a seamless integration with Redux middleware, resulting in a standardized and highly accessible state management system.
- Elevated back end performance by consolidating SQL queries and standardizing endpoint responses.
- Architected and maintained a home application server, robust security, and seamless deployment in a production environment.

Core Skills

React, JavaScript, Node.js, PostgreSQL, SQLite, Ruby, Rails, Git, Websockets, Nginx, SQL, Redux, Shell Scripting, CSS, HTML, RSpec, Jest, Integrations : AWS S3, AWS SES, Google OAuth 2.0, Google Maps, Google Calendar, Stripe, MongoDB, Shopify, Agile, REST, GraphQL, Object-Oriented Programming (OOP), Test-Driven Development (TDD), Attention To Detail, Adaptability, Data Analytics, Technical Innovation, ideation, Critical Thinking, Problem-Solving, Strategic Planning, Payment Processing, Payment Distribution, User Authentication, Improved Reliability, Development Languages, Problem-Solving Skills, Programming Principles, Business Requirements, Code Review, Coding Standards, Product Management, Provide Technical Support, Quality Assurance, Technical Documentation, Technical Skills, AJAX, Computer Science, Office Work, Web Development, Web Servers, Motivated, Troubleshooting

Education

Utah State University

Coursework Management Information Systems

Languages

English (*fluent*), **Spanish** (*fluent*)

Awards

Activate Founders Credit Recipient

Feb 2024

Amazon Web Services

Awarded \$1,000 AWS Founders Credit for outstanding project development. Recognized for innovative use of AWS services, including cloud architecture design, implementation of cost-saving measures, and the successful deployment of scalable web and mobile applications.
